Digital Payment Technologies Corp. Introducing Multi-lingual Software Support at PIE

Vancouver, B.C. – Digital Payment Technologies Corp., a leading manufacturer of innovative multi-space parking payment stations, is pleased to announce that it will be introducing multi-lingual software support at this year's Parking Institute Exhibition, August 23 to 25, 2006 in Chicago, IL.

Multi-lingual software support in parking equipment is becoming increasingly important in communities where multiple languages are spoken. These new software capabilities will allow parking operators, universities, and municipalities to deliver higher levels of service to their customers with the availability of clear instructions in their chosen language.

Both the LUKE on-street and Shelby off-street payment stations will support this new feature. Up to four languages may be supported at one time and these languages can be either roman character based (for example, French and Spanish), non-roman character based (for example, Chinese and Vietnamese), or both.

In addition to product demonstrations of this new feature, Digital Payment will have full demonstrations of all features on the LUKE and Shelby payment stations as well as its BOSS Software Management System and Enterprise Management System web portal.

Digital Payment will be located in booth 614 and will present an iPod Nano at the end of the exhibition to one of the delegates visiting the Digital Payment booth. Attendees wanting to book demonstrations in advance of the Conference and Exhibition are encouraged to contact Digital Payment at 1-888-687-6822 and speak to their Regional Account Manager.

About Digital Payment Technologies Corp.:

Digital Payment (formerly Digital Pioneer) is an innovative leader in the design, manufacture and distribution of revenue-management hardware, software and wireless solutions for the multi-billion-dollar parking industry. The company's products provide complete financial tracking, control and reporting on parking revenue collected by cities, municipalities, parking management companies, private operators and national parks, from customer payment through to bank deposit.
