City of Glendale Selects Equipment from Digital Payment Technologies for Municipal Parking Spaces

The City of Glendale has plans to deploy 80 LUKE pay stations over the next two years

Vancouver, BC - **Digital Payment Technologies (DPT)**, a leading supplier of electronic parking meters and internet based management solutions for the global parking industry, is pleased to announce its recent order from the City of Glendale to supply LUKE parking pay stations for the city's on-street and off-street parking operations. The initial order is for 37 LUKE pay stations configured with coin acceptors, credit card readers, and online services, with a plan to install up to 80 machines.

"Glendale is very pleased to have selected Digital Payment Technologies and the LUKE pay station for our parking requirements", commented Jano Baghdanian, Traffic & Transportation Administrator for the City of Glendale. "Key factors in our decision included the payment options, ease of use, and the ability to network all pay stations."

"DPT has always had a strong and growing client base in California with several leading parking operators, universities, and cities," commented Chris Chettle, Vice President of Marketing at DPT. "We are excited to add the City of Glendale to our client base and look forward to expanding our relationship in the future."

Installation of the new meters is now complete with the first meters going live the first week of December. Future technology capabilities being explored by the city include enforcement handheld integration.

About Digital Payment Technologies Corp.

Digital Payment Technologies is an innovative leader in the design, manufacture and distribution of electronic parking meters, management software and online services for the multi-billion-dollar parking industry. The company's products provide complete financial tracking, control and reporting on parking revenue collected by cities, municipalities, universities, parking management companies, private operators and national parks, from customer payment through to bank deposit. In 2007, DPT was named Emerging Company of the Year by the British Columbia Technology Industry Association and placed on Deloitte's Technology Fast 50 and Fast 500 lists for the second year in a row as one of the fastest growing high technology companies in Canada and North America.
